

The SCORE Final Conference Supporting Consumer Ownership in Renewable Energy: Challenges to be met

will take place on

Wed. 17th Nov. 14-18 hrs & Thu. 18th Nov., 10-14 hrs, 2021

at the Energy Centre of the Politecnico di Torino
Via Paolo Borsellino 38, Turin, Italy

SCORE - Supporting Consumer Ownership in Renewable Energies

The EU “Clean Energy Package” introduced the “active consumer” as prosumer and their rights to produce, sell and share their own electricity in “Renewable Energy Communities” (RECs). Currently EU Member States are transposing the new rules (RED II & IEMD) into national law. The national rules differ widely esp. regarding the “enabling framework” for RECs and the economic conditions for energy/electricity sharing.

In this light the conference discusses four main themes:

- (i) What lessons to be drawn from SCORE pilots and follower city projects esp. for municipalities?
- (ii) How to activate individual consumers to become prosumers and engage in energy efficiency?
- (iii) What opportunities and synergies can energy / electricity sharing provide for RECs?
- (iv) What business opportunities for professional actors from the energy world?

As of now, the event will be held in a digital format due to the uncertainty of the development of the COVID pandemic. Speakers of our invited round table discussion (life) are:

- **Dr Dörte Fouquet** - Director of European Renewable Energies Federation EREF;
- **Prof. Patrizia Lombardi** - Vice-Rector of the Politecnico di Torino;
- **Jutta Paulus** - Member of the European Parliament for the Greens/EFA (tbc.);
- **Vincent Berruto** - DG ENER, Deputy Director-General, Coordination Just & Green Energy Transition (tbc.);
- **Prof. Domenico Villacci** - President of the Italian Interuniversity Consortium EnSiEL.

We remain at your disposal for any questions or queries at Kelso-professorship@europa.uni.de,

Best regards,
the SCORE Team

This conference is organised in partnership with

**Politecnico
di Torino**
