# SCORE Follower Cities

- Follower Cities are on their way to implement the CSOP or other energy community models locally
- Learn from experiences in the pilots and receive support from SCORE partners
- Contribute with their own learnings
- **Ca. 30 municipalities from 12 EU countries**

**Urbino,  
IT**

**Heeten, NL**

**Cascais,  
PT**

**Magliano  
Alpi, IT**

**Krk  
Island,  
HR**

**Doubrava,  
CZ**

**Ślupsk,  
PL**

**Vega de  
Valcarlos,  
ES**

The SCORE Follower Cities cooperate with us on topics like energy sharing, citizen participation models, and the set-up of renewable energy communities.

**Some of our  
Follower Cities**

# Main obstacles and challenges

1

## Regulatory challenges

Uncertainty about novel transposition of RED II and interpretation of new legal definitions

Incomplete transposition of RED II articles and resulting regulatory barriers

2

## Building the business case

Selection of the business model: Innovative vs. traditional models

Municipalities and citizens as co-investors

3

## Consumer involvement

Social welfare dilemma: The dilemma of losing eligibility for social welfare benefits

Finding the right intermediaries and local partners to involve consumers

# Achievements

- Contribution to climate neutrality and strategic goals
- Social cohesion
- Sense of community and capacity building
- Combating energy poverty
- Feasibility studies and energy consumption profiles
- Workshop with municipality and citizens
- Legal and economic support

Climate Alliance

Supporting Consumer Ownership in Renewable Energies

Thank you!

And let's keep supporting municipalities in driving  
a democratic energy transition locally.
